Ok, I'm switching back to uvs2...

r20 works great!

But, when compiling uppweb,

I've got an error:

LINK : fatal error LNK1181: cannot open input file
'E:\Devel_upp\a_upp_Mirek_dev\out\Topic\MSC71.Gui\Topic.lib'

And there's no Topic dir in uncompressed uppsrc while it existed in my old uvs sources and still exists in uvs.uppsrc.

How to solve this problem?
