Well, it seems like there are more and more problems coming up with MSC15, this time with 2010 sources (in another project).

A simple Format("%s %d", "bla", 1); results in a crash in optimal mode, debug works fine though. Exception: C0000005 at 150C170

EXCEPTION_ACCESS_VIOLATION

reading at 0000001C

Callstack is in the picture.

Thanks for help.

#endif

}

```
//edit: Same fix seems to work. I changed Single to: template <class T>
T& Single() {
  #ifndef flagMSC15
  static T *p;
  ONCELOCK {
    static T o;
    p = &o;
  }
  return *p;
  #else
  static T x;
  return x;
```
