Hello all!

Dont work Debug mode (F5) . Has what is the time passed, and things are right where they
started!
Debugging of programs by means of breakpoints is impossible. It is possible to use PromptOK(
"Message") or other similar tricks. It really doesn't matter what debug does not work at all?

Rosa Linux Fresh R8 (KDE4), U++ 10160 64 bit

These packages need to compile U++ :

sudo urpmi gcc-c++ cmake gdb lib64gtk+2.0-devel lib64bzip2-devel lib64mysqlclient-devel
lib64notify-devel lib64sox-devel lib64xft-devel expat lib64expat-devel

With best regards Navadvipa Chandra das.
