mirek wrote on Thu, 08 September 2016 12:22I do not see identical lines:)

Mirek
 :o

Thank you!

OK, but for now I'm NOT including this file yet. May include it later or might move it to the U++ enabled code, and then there is no problem with licensing. In that content it might count as a fork.

And speaking of licensing, I removed MINGW from the package and will not include Clang. I packaged MINGW separately, in its own archive, and will rely on auto-detect for Clang. From Program Files/LLVM.

And started reading:
