fudadmin wrote on Sat, 19 August 2006 11:29more about Topic:

I added Topic package from subversion and now I've compiled uppweb but pages show COMPRESSED pages...

Ideas?

I'm repeating this post just to draw Mirek's attention.

Am I very unlucky with uvs2 or something is not updated?

P.S. I need a book "how to use uvs2"...

in short: what is export and import in uvs2? Do they work the same like in subversion?

Why then, when I try to export in uvs2, it starts connecting to the net?

P.S2. uvs2 is driving me mad...
