I added Topic package from subversion and now I've compiled uppweb but pages show COMPRESSED pages...
Ideas?

I'm repeating this post just to draw Mirek's atttention.
Am I very unlucky with uvs2 or something is not updated?
P.S. I need a book "how to use uvs2"...
in short: what is export and import in uvs2? Do they work the same like in subversion?
Why then, when I try to export in uvs2, it starts connecting to the net?
P.S2. uvs2 is driving me mad...
