Hi,

Sorry for my English, i'm French and i don't speak very well this language.

I have a problem, i want to print something into a LineEdit into a thread.

This is what I wrote:

```
void Processus( bool *boucle, LineEdit *l )
{
    while( boucle )
    {
        l->Insert(-1, "test\n" );
        boucle = false;
    }
}
```

...

```
void Test::ConnexionClient()
{
    ...
    Thread::Start( callback2( Processus, &boucle, &client.lignesClient ) );
    boucle = true;
    ...
}
```

In lay file i have:

```
ITEM(LineEdit, lignesClient, LeftPosZ(7, 601).TopPosZ(85, 253))
```

I have this error when i execute my program:

Can you help me ? How to use GuiLock ?

I'm using TheEDI Windows edition.

Thank you !
