log is an instance of LineEdit:

void MoveTextEnd(bool sel = false)

Moves the cursor in specified direction (Home/End are beginning/end of line). If sel is true, selects characters between starting and ending cursor position.

void ScrollEnd()

Scrolls the text to the end.

Take a look at the manual: [http://ultimatepp.org/src\\$CtrlLib\\$LineEdit\\$en-us.html](http://ultimatepp.org/src$CtrlLib$LineEdit$en-us.html)
