Hello,

On Centos 7 64bits, I got following errors during installation of TheIDE/uppsrc package from SF.net after untarring upp-x11-src-9251.tar.gz and executing make:

```

```

Further, I also got during the same process:
gmake[1]: Leaving directory `/root/install/upp/uppsrc'
cp: cannot stat 'uppsrc/ide.out': No such file or directory
Is there a solution for this?
