akebee wrote on Thu, 05 January 2017 11:33hi, the AsJSON cannot deal with int64 value,
the code

```
Value item_id = 6364210481850221057;  
DUMP(AsJSON(item_id));
```

will log a double value,
how to fix it? :p

That is not a bug, that is a feature :) This is because javascript doesn't have int64. Only values less than 2^{52} are supported for integers, higher numbers are converted to double (an loose precision!).

Best regards,
Honza
