Subject: Re: int64 in JSON Posted by dolik.rce on Thu, 05 Jan 2017 13:26:44 GMT View Forum Message <> Reply to Message

akebee wrote on Thu, 05 January 2017 11:33hi, the AsJSON cannot deal with int64 value,

the code

Value item_id = 6364210481850221057; DUMP(AsJSON(item_id));

will log a double value, how to fix it? :p

That is not a bug, that is a feature :) This is because javascript doesn't have int64. Only values less than 2^52 are supported for integers, higher numbers are converted to double (an loose precision!).

Best regards, Honza
