Hi,

Answer to my question.

To use standard functions UscGlobal needs init.

It is done like this at the beginning of the code.

StdLib(UscGlobal());

It will init ArrayMap with all StdLib Functions

```
is_number
is_array
is_map
is_void
int
to_string
to_number
count
keys
values
rand
reverse
sort
order
replace
ToUpper
ToLower
len
mid
exists
OpenFileOut
OpenFileAppend
OpenFileIn
GetSysTime
IsDate
IsTime
sin
cos
tan
asin
acos
atan
```

sinh
cosh
tanh
asinh
acosh
atanh
exp
log
log10
exp2
log2
sqrt
cbrt
pow
atan2
