Hi,

Answer to my question.

To use standard functions UscGlobal needs init.

It is done like this at the beginning of the code.

```
StdLib(UscGlobal());
```

It will init ArrayMap with all StdLib Functions

```
is_number  
is_array  
is_map  
is_void  
int  
to_string  
to_number  
count  
keys  
values  
rand  
reverse  
sort  
order  
replace  
ToUpper  
ToLower  
len  
mid  
exists  
OpenFileOut  
OpenFileAppend  
OpenFileIn  
GetSysTime  
IsDate  
IsTime  
sin  
cos  
tan  
asin  
acos  
atan
```

sinh
cosh
tanh
asinh
acosh
atanh
exp
log
log10
exp2
log2
sqrt
cbrt
pow
atan2
