Export it as string.

```
{  
  "item_id": "6364210481850220544",  
  "value": "6284399068525478145",  
}
```

Then also import as string. Then convert back to int64 (I would expect "id" to be rather uint64).
