Spaces in directories fixed,
so if you have it in "Program Files", tools should work now!
although for files spaces are not allowed for easier access

Updated:

- some bug fixes, known: on non-wxp when f2 is re-used, it doesn't reposition gfx window right
- few things added - chk Help/About/Vector? controls,
- like regex for search in editor - type --help'Enter' for more

Part2 is in next/prev post!
