Subject: [sqlite] SqlCurrentTime is inconsistent with TIME definition

Hi,

TIME in sqlite is defined as "datetime", but SqlCurrentTime is just "time('now')", not "datetime('now')", so when I insert/update TIME field I got only hour without date.

Sqlite3Schema.h:
```
#define TIME(x)                 COLUMN("datetime", Time, x, 0, 0)
```

SqlVal.cpp:
```
SqlVal SqlCurrentTime() {
 return SqlVal(SqlCode(SQLITE3, "time('now')")
                 ("current_timestamp"), SqlVal::HIGH);
}
```
