upp-mingw-10732, file upp\uppsrc\plugin\bmp\bmphdr.h

Hello!

I'm not sure that it is necessary to specify COMPILER\_GCC here.

```
#if defined(COMPILER_MSC) || defined(COMPILER_GCC)
#pragma pack(push, 1)
#endif
```

.....

```
##ifdef COMPILER_MSC
#if defined(COMPILER_MSC) || defined(COMPILER_GCC)
#pragma pack(pop)
#endif
```

Rather MINGW as he sharpened by compatibility with visualc therefore likely

```
#if defined(COMPILER_MSC) || defined(COMPILER_MINGW)
#pragma pack(push, 1)
#endif
```

.....

```
##ifdef COMPILER_MSC
#if defined(COMPILER_MSC) || defined(COMPILER_MINGW)
#pragma pack(pop)
#endif
```
