## Subject: [SOLVED] Logging and LOG\_APPEND Posted by Giorgio on Fri, 20 Jan 2017 14:01:28 GMT

Hi there,

I am implementing a simple logging facility in an application. I realized that every time the application is started, the log file is cleared. So, I found in the documentation that I have to setup the logfile using StdLogSetup(LOG\_APPEND). I did so, but now messages created with RLOG are not logged. What am I doing wrong? Regards,

Gio
