Subject: Quick way to build a console app on mac
Posted by mdelfede on Sun, 22 Jan 2017 21:55:30 GMT

Hi all,

I'm wondering if there's a "quick" way to build a command line app on mac using Upp.
No need for gui, just core (and networking).
I'm too used to upp to learn another toolkit just to build a couple of command-line apps on Mac...
