hongdong wrote on Mon, 21 August 2006 05:23just another try failed:in following block,I can't input Chinese to replace "hello".

```
test::test()
{
    CtrlLayout(*this, "hello");
}
```

```
GUI_APP_MAIN
{
    test().Run();
}
```

Well, this one is most likely caused by file encoding setting. Go to File properties and check. Then adjust the font in Environment settings to make it work...
