Subject: How to get proper topic

Lets say that I have the same topic written in two different lanuages:

HomeBudget/src/About$pl-pl
HomeBudget/src/About$en-us

Is there any way to get topic in poper language automatically?
Now I'm doing sth like this (I must specify $xx-xx suffix, otherwise nothing will be displayed):

```
if lang = polish
dlg.info.SetQTF(GetTopic("HomeBudget/src/About$pl-pl"));
else
dlg.info.SetQTF(GetTopic("HomeBudget/src/About$en-us"));
```

Is there method like let's say GetTopicLang.. which returns topic in language selected in SetLanguage() eg:

GetTopicLang("HomeBudget/src/About") (without suffix)
