Lets say that I have the same topic written in two different lanuages:

HomeBudget/src/About\$pl-pl

HomeBudget/src/About\$en-us

Is there any way to get topic in poper language automatically?

Now I'm doing sth like this (I must specify \$xx-xx suffix, otherwise nothing will be displayed):

if lang = polish

dlg.info.SetQTF(GetTopic("HomeBudget/src/About\$pl-pl"));

else

dlg.info.SetQTF(GetTopic("HomeBudget/src/About\$en-us"));

Is there method like let's say GetTopicLang.. which returns topic in language selected in SetLanguage() eg:

GetTopicLang("HomeBudget/src/About") (without suffix)
