Subject: How to get proper topic Posted by unodgs on Mon, 21 Aug 2006 13:43:56 GMT View Forum Message <> Reply to Message

Lets say that I have the same topic written in two different lanuages:

HomeBudget/src/About\$pl-pl HomeBudget/src/About\$en-us

Is there any way to get topic in poper language automatically? Now I'm doing sth like this (I must specify \$xx-xx suffix, otherwise nothing will be displayed):

if lang = polish
dlg.info.SetQTF(GetTopic("HomeBudget/src/About\$pl-pl"));
else
dlg.info.SetQTF(GetTopic("HomeBudget/src/About\$en-us"));

Is there method like let's say GetTopicLang.. which returns topic in language selected in SetLanguage() eg:

GetTopicLang("HomeBudget/src/About") (without suffix)
