When splitting window horizontal or vertical and setting top/lower window size other than default, size isn't preserved when switching between the two.

2nd:

i don't know if this is a feature or a bug, but when setting vertical splited window, font gets smaller

3rd:

when ide colors are set manually and then settings->abbreviations... is set, all colors are set to default one.

This was noticed on upp10823, w32xp

This is not the right thread for this, but anyway:
can for example thrownOutOWatcom support/or dmc be used with script, if, how? I know it can be with macros though...
