Subject: Reading from .txt and putting data (double) in array[]
Posted by Diego22 on Tue, 21 Feb 2017 20:36:55 GMT

Hi,

I need to read a .txt already created and fill a array with the numbers of the indicated lines.
File starts with words and other numbers, so I want to read from 7th line to 19th, then put these 12 numbers (double) in a int array[].

I've been trying for a long time but I have not been able to. Let's see if someone can help me.

Regards.
