Hi,

the call to

```
windres = GetHostPathShort( fullpath);
```

is supposed to convert

```
C:\u pp\bin\mingw64/64/bin\windres.exe
```

to

```
C:\UPP~1\bin\mingw64/64/bin\windres.exe
```

and it work like that for me.

can you look inside GetHostPathShort (breakpoint for example) and verify why it fail ?
