deep wrote on Mon, 27 March 2017 10:46Hi cbpporter

If I select Builder without x64 then it is giving linking error.

Any Builder with X64 Linking is working. I want to build for 64 bit system.

my thanks also. "Builder without x64" needs other paths.. to x86 stuff.

I just installed UPP after some time, and installed VS community 2017 also, and tried your BM file after some path adjustments.

next thing to try... clang/c2???
