my application frequently attempts to connect to the database server.
see the pic:

and the code:

```
while(1)
{
    MSSQLSession mssql;
    for(;;) {
        String cs = "Driver={SQL Server};;";
        cs << "Server=" << "127.0.0.1" << ';;';
        String h = "sa";
        if(IsNull(h))
            cs << "Trusted_Connection=Yes;";
        else {
            cs << "UID=" << h << ';;';
            // Cout() << "Password:";
            cs << "PWD=" << pass << ';;';
            // Cout() << "Database (empty for default):";
            h = "";
            if(IsNull(h))
                cs << "Database=" << h << ';;';
        }
        Cout() << "Connect mssql:" << cs << "\n";
        if(!mssql.Connect(cs))
            Cout() << "Connect failed: " << mssql.GetLastError() << '\n';
        else
            break;
    }

#ifdef _DEBUG
    mssql.SetTrace();
#endif

    //do some work
    Sleep(1000);

    mssql.Close();
}
```
