Hello cbpporter,

cbpporter wrote on Thu, 13 April 2017 13:31 Does it work for HTTP(S) file gets?

I need to implement a large file downloader with pause and resume...

You mean Ftp over Http? Unfortunately, no. It's out of FTP package's scope.  
But you can already download large files with it. Resume and pause is not implemented (yet).

Regards,

Oblivion.
