omari wrote on Fri, 14 April 2017 20:25in this overload :

```
void HighlightOutput::Put(int count, const HIStyle& ink, const HIStyle& paper)
{
    Set(pos, count, ink);
    SetPaper(pos, count, paper.color);
    pos += count;
}
```

To simplify the use, the third parameter(const HIStyle& paper) can be just a color:

```
void HighlightOutput::Put(int count, const HIStyle& ink, const Color paper)
{
    Set(pos, count, ink);
    SetPaper(pos, count, paper);
    pos += count;
}
```

with this overload, instead of

```
HIStyle paper;
paper.color = LtYellow();
Put(5, ink, paper);
```

i can call it like:

```
Put(5, ink, LtYellow());
```

OK. In the trunk.
