Hi rxantos,

rxantos wrote on Thu, 20 April 2017 14:44: Is it possible to do an "INSERT OR REPLACE INTO" query using U++?

That is sqlite syntax, right? Quick and dirty solution is to add the "or replace" part into the query:

```
SqlStatement OrReplace(const SqlInsert& insert) {  
    String s = SqlStatement(insert).Get(SQLITE3);  
    ASSERT(s.StartsWith("insert "));  
    s = "insert or replace " + s.Mid(7);  
    return SqlStatement(s);  
}
```

The same could be of course done for any other dialect as well, as long as you respect the supported SQL syntax.

Best regards,
Honza
