Subject: problem with String and == operator in 608-dev1

---

With 607-dev1 and MSC8 I could compile the following code:

```
...  
if ( AsString(~editCountry) == Null) editCountry <<= "---";  
...
```

Now with 608-dev1 the compiler cry:

```
C:\Vega\Vega5\VegaTab1.cpp(179) : error C2593: 'operator ==' is ambiguous  
    C:\upp\uppsrc\Core/Value.h(187): could be 'bool operator ==(String,const Value &)'  
    C:\upp\uppsrc\Core/String.h(154): or 'bool AString<T,S>::operator ==(const S &,const S &)'  
[found using argument-dependent lookup]  
with  
  [  
    T=char,  
    S=String  
  ]  
while trying to match the argument list '(String, const Null)'
```

Is something changed during the holidays? (even Mingw complain about '==' operator)

Luigi
