Quote:Hi Oblivion,

This sounds interesting and might well fit my needs to automate some file transfers. Is it possible to get a hold of a copy of this SFTP client module of yours?

Best regards,

Tom

Hello Tom,

Since you've revived this topic, let me give some information on recent developments. :)

Some time ago I decided to go for a full SSH package. As of today, SFtp and Scp modules are complete, and Exec module is to-be-written.

I'm cleaning up the codebase now. A technical preview version is scheduled, and will be available in June 10, 2017. :)

I'll publish and further develop it for U++ with a BSD license, so of course you'll have the chance to get a copy.

But I'm afraid you'll have to wait a little more.

Regards,

Oblivion
