Hi Peter,

I haven't check the code, but if I remember it correctly the check you perform should actually look like this: if (IsNull(value)) {

```
    PromptOK("Invalid number!");
```

```
    return;
```

```
}
```

```
else
```

```
    PromptOK("Number accepted!");
```

The edit field returns Null value when it is empty, invalid or outside of the allowed range.

Best regards,

Honza
