
Subject: TreeCtrl display bug

U++ has this nice feature when some item can't be displayed in a rect, a tool-tip appears with the full text.

This works fine with a narrow TreeCtrl where you add a very wide child. Mouse-over the child and it will popup perfectly.

But if I add a display to the TreeCtrl, the popup jumps up about 2-3 pixels vertically.

This is an incredibly serious mega bug :lol:.

```
treetest::treetest()
{
    CtrlLayout(*this, "Window title");

    tree.SetRoot(Image(), "test");
    tree.SetDisplay(Single<ItemDisplay>());
    tree.Add(0, Image(), "aaaaaaaaaaaaaaaaaaaa");
    tree.Open(0);
}
```

Comment out the `tree.SetDisplay(Single<ItemDisplay>());` and the tool-tip vertical jump is no more.

Test case attached.
