
Subject: Console app, where are the args?

Hi Guys,

A console app looks something like:

```
#include <Core/Core.h>
#include <iostream>
```

```
using namespace Upp;
using namespace std;
```

```
CONSOLE_APP_MAIN
{
    cout << "HELLO" << endl;
}
```

What's the magic code to extract command line arguments?

Peter
