Hi,

I have been using U++ (thanks for this great tool!!) some time back and resumed its usage after a break.

I am trying to use Tab control and wanted to change the background color of the layouts. I went through the forum and understood there is no direct way to do it, but, can be done through Frames.

I tried to implement the task (attached the case) but it is not working, neither giving any error message.

Can someone please look into it and suggest the fix?

Thanks a Lot for your help in advance.
