porthos wrote on Thu, 29 June 2017 19:51 I need to establish a connection to the Oracle 12c database, however I realized that U++ only supports version 8 of the Oracle. Can you tell me another method of connecting using Oracle that works with U++. If you can send an example, thank you!

The last time I have checked, Oracle was 'backwards compatible' w.r.t. client. I bet that Oci8 will work with 12c.

I think that at the time I was abandoning Oracle, I was using Oci7 with Oracle11g.
