Hello,

This patch is not on the trunk. Take a look at .upp file of GLCtrl (<https://github.com/ultimatepp/mirror/blob/master/uppsrc/GLCtrl/GLCtrl.upp>):

uses

```
CtrlCore; // No CtrlLib dependency
```

```
library(WIN32 GCC) "glaux glu32 opengl32";
```

```
library(LINUX | BSD) "GL GLU";
```

```
library((LINUX | BSD) & !X11 & !NOGTK) "gdkglext-x11-1.0 gtkglext-x11-1.0";
```

file

```
GLCtrl.h,  
GLPicking.cpp,  
Win32GLCtrl.cpp,  
X11GLCtrl.cpp,  
GtkGLCtrl.cpp,  
GLCtrl.cpp;
```

Anyway, this is not the problem here. OpenGL was working without CtrlLib for the long time. I believe the latest Core modification causes the CtrlLib dependency on the linking level. Mirek have you got any suspicion in this area?

Sincerely,
Klugier
