Good idea. Added (but I think you have a small error there, I have changed it to:

```
ImageBuffer b(cx, yy - y);  
RGBA* t = b;  
int y0 = y; // <<<!  
while(y < yy) {  
    if(progress(y - y0, yy - y0)) // <<<!  
        return Null;  
    memcpy(t, ~GetLine(y) + x, cx * sizeof(RGBA));  
    t += cx;  
    y++;  
}
```
