I don't know what's happening... but

for the new 608 this should help:

```
VegaMain::VegaMain()
{
    CtrlLayout(*this, "Forlano Vega Main");
    spls.Vert();
    spls.SetPos(8000);
    spls.Add(tabs);
    spls.Add(consoleFrame);
    spls.AddFrame(NullFrame()); //FIX for 608 or add any frame
    ...
}
```

Yes, it works!

One day I'll understand why, but for the moment I'm and it is enough.

Thanks,

Luigi
