Ops.

Can you test this fix, please?

```
int LocalProcess::Finish(String& out)
{
    out.Clear();
    while(IsRunning()) {
        out.Cat(Get());
        Sleep(1); // p.Wait would be much better here!
    }
    for(;;) {
        String h = Get();
        if(h.IsVoid())
            break;
        out.Cat(h);
    }
    return GetExitCode();
}
```
