BugFixes:

@tool ...; properly working params
properly get ui objid/clsid, like gfxget,... etc
win7 - properly set window size when switching with F2(toggle ui) - i didn't test this on xp though
faster gfx window redrawing(ztBug)
... etc ...
2knownBugs to go

Added:

native windows snippets(sample template): demo added through wnative.cpp.all/wnative.gfx
exportOnlySample: demo added in zz_zexp folder - setPathToGcc and dblclick
export-and-compile.bat
customizableDesignModeButtons: now usertools can be switched through
this(sample-clickOn1st2ndDmButton-blue/red)
more esc script functions added
...
For more check note.txt

Part2 is in next/prev post!
