Hello

I followed the following instruction to install Ultimate++ in my Ubuntu computer:

```
sudo add-apt-repository ppa:dolik-rce/upp
```

```
sudo apt-get update
```

```
sudo apt-get install upp
```

and I have the following error:

```

```

```
N: Data from such a repository can't be authenticated and is therefore potentially dangerous to use.
```

```
N: See apt-secure(8) manpage for repository creation and user configuration details.
```

```
E: Failed to fetch http://ppa.launchpad.net/dolik-rce/upp/ubuntu/dists/zesty/main/binary-amd64/Packages 404 Not Found
```

```
E: Some index files failed to download. They have been ignored, or old ones used instead.
```

My ubuntu version is:
