What about AddKey ? Which is essentially the same as AddIndex, just checks that it is added as the zero index.

```
ArrayCtrl list;  
list.AddKey(); // not visible  
list.AddColumn("Something");  
  
list.Add(1, "One");  
list.Add(2, "Two");  
  
list.GoBegin();  
ASSERT(list.Get(list.GetCursor(), 0) == 1);  
ASSERT(list.GetKey() == 1);
```
