I am newbie in Ultimate++.

I am using CodeEditor class, No syntax highlighting and auto indent. How say CodeEditor that my syntax is c++ or other?

My first program:

```
#include <CtrlLib/CtrlLib.h>
```

```
#include <CodeEditor/CodeEditor.h>
```

```
using namespace Upp;
```

```
struct MyAppWindow : TopWindow {  
    Button button;  
    CodeEditor ed;
```

```
void Click() { PromptOK("You have clicked the button!"); }
```

```
typedef MyAppWindow CLASSNAME;
```

```
MyAppWindow() {  
    Title("My application with button");  
    Add(ed.LeftPos(10, 200).TopPos(10, 200));  
    button.SetLabel("Click me!");  
    button <<= THISBACK(Click);  
}  
};
```

```
GUI_APP_MAIN
```

```
{  
    MyAppWindow app;  
    app.Run();  
}
```
