Giorgio wrote on Tue, 26 September 2017 15:23Hi Mirek,
I am sorry not giving you feedback, but I am currently on a different project. Anyway, this "touch screen project" is really important in my company and I will provide you with any information/test/debugging you require.
Regards,
Giorgio

Would it be possible to add DUMP(p) to Switch::MouseMove / Switch::LeftUp / Switch::LeftDown, do "wrong touch" and send me the log?

Mirek
