Hello! Is it possible add into "Connect" method the charset parameter?

For example:

```
void FBSession::Connect(  
    const char* dbname,  
    const char* host,  
    const char* user,  
    const char* pswd,  
    const char* charset,  
    const String& dllName,  
    ibpp::network_protocol_t protocol  
)  
{  
    if (!dllName.IsEmpty())  
        dll.SetLibName(dllName);  
    if (!dll.Load())  
        throw ibpp::DbExc(dll.GetLibName() + " wasn't found.");  
  
    // Service  
    svc.attach(host, user, pswd, protocol);  
    SvcConnected = true;  
  
    // Database  
    db.setUserName(user);  
    db.setPassword(pswd);  
  
    db.setCharSet(charset);  
  
    db.attach(dbname);  
    DbConnected = true;  
    DbName = dbname;
```

otherwise, when connecting to my base db.attach causes the error if you don't add db.setCharSet("WIN1251"); before it.

Thanks!
