Hello,

If you have solution for any bug or feature mention in our bug trucker https://www.ultimatepp.org/redmine/projects/upp, please fell free to inform us in this forum thread. If you want to help us before the release, find the problem and solve it.

If the bug is not presented in the bug trucker and solution is presented on the forum or somewhere else. We need to know this also.

At the end I would like to thanks all contributor that I have worked with in the 2017.2 period. My hero is Omari who wrote macro manager for us and contributed to solve long term terminal app debugging on Windows with GDB.

Sincerely,
Klugier
