Hello Luigi,

From your description, you seem to be looking for LocalProcess, and its global functions:

[https://www.ultimatepp.org/src\\$Core\\$AProcess\\$en-us.html](https://www.ultimatepp.org/src$Core$AProcess$en-us.html) (See the end of the doc. Sys() command may be what you are looking for.)

And

You may want to use it with [https://msdn.microsoft.com/en-us/library/windows/desktop/aa365530\(v=vs.85\).aspx](https://msdn.microsoft.com/en-us/library/windows/desktop/aa365530(v=vs.85).aspx) on windows.

Best regards,

Oblivion

Hello Oblivion,

you are right, SetCurrentDirectory(folder_path) did the trick.

Later I'll inquire the localprocess method hoping to gather the output made by the problem.

Thanks and best regards,

Luigi
